

# Interact club of NPS, EVENT REPORT

Project Number: 2

Date: 6 October 2026

Location: Nepal Police School Sanga, Kavre

Collaborated with: None

Specified Committee: Club

Sponsoring Organization(s): None

Guests: Principal(Mr. Mohan Poudel),Academic Vice Principal(Mr. Bharat Sigdel) & Pastoral Vice Principal(Mr. Govinda Kunwar)

Area of Focus: Creativity and Environmental Awareness

Project Status: Hosted

## About “Best from Waste”

### Introduction

The Interact Club of Nepal Police School for students of Grades 4, 5, and 6 to encourage creativity, innovation, and the productive reuse of waste materials. The program aimed to help students understand how discarded materials could be transformed into creative and useful items rather than being thrown away. By engaging junior students in this activity, the club sought to promote creative thinking, environmental responsibility, and the About the Best from Waste Program Introduction. The Best from Waste Program was organized by habit of reusing available resources.

### Project Summary

The "Waste to Best" program was organized by the Interact Club of Nepal Police School, Sanga, Kavre for students in Grades 4–6. Following a one-week preparation period, approximately 20–40 students participated in a one-day event where they transformed recyclable items—such as plastic bottles, cardboard, paper, packaging, and natural materials—into innovative, artistic models. To promote inclusion and teamwork, the Interact Club evaluated the entries and selected one best entry from each grade (Grades 4, 5, and 6) rather than traditional overall runner-ups. Winners received art and craft supplies and certificates to encourage their creative talents. The event received positive feedback from students and school administration, successfully instilling early habits of environmental responsibility and resourcefulness.

The club established its own judging criteria. To encourage inclusion, one best entry was selected from each class instead of choosing a single overall first-place and runner-up entry. Prizes and awards were presented; certificates were not issued.

**Outcomes:** The project promoted creative thinking, reuse of materials, environmental awareness, and teamwork. It gave students an opportunity to turn common waste materials into useful or decorative creations and reinforced the importance of reducing waste through practical action.

### Project Photographs

*Photographs documenting project entries, student participation, and the recognition ceremony.*

**Photo 1:** The Principal presenting awards to the participants.

**Photo 2:** Cu.S.D ltr.Smrity Nepal reviewing the project entries alongside the school administration.

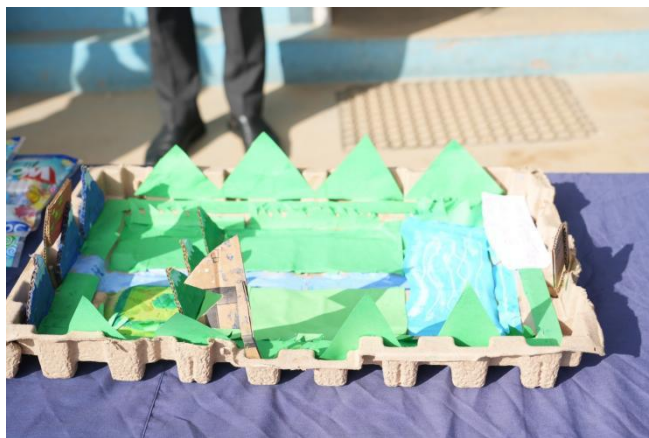

**Photo 3:** Student-created projects displayed during the event.

**Photo 4:** Group photograph taken during the prize distribution ceremony.

**Photo 5:** Cu.S.D ltr. Smriti Nepal presenting the project to the audience.

**Photo 6:** A student-created project made from reusable waste materials, demonstrating creativity and the practical application of the “Best from Waste” theme.
