

Beyond the Paws

Project Number:9
Date:4, October,2026
Location:Digital Platform
Collaboration with:

1. Interact club of Santa Rosa

Specified committee:Community Service

Area of Focus: Animal Welfare and Environmental Protection

About 'Beyond the Paws'

Introduction:

The "Beyond the Paws" event was an international collaborative initiative organized to mark World Animal Day, focusing on animal welfare, compassion, and the importance of protecting all living creatures. As animals play an essential role in maintaining ecological balance and are an important part of our world, raising awareness about their significance and well-being is equally important. The event was organized in collaboration with Interact Club of Santa rosa from Brazil, bringing together Interactors from different parts of the world to work towards a shared cause. Through this initiative, the event aimed to spread awareness about the importance of animals, encourage kindness and responsible treatment towards them, and highlight the need to protect and care for all living creatures.

Project Summary:

The "Beyond the Paws" event was carried out as an international collaboration with Interact Club of Santa Rosa from Brazil, bringing together individuals from different parts of the world to spread awareness about animal welfare. The initiative focused on

highlighting the importance of animals in our lives and the need to treat all living creatures with kindness, care, and compassion.

As part of the collaboration, the participating clubs worked together to create an informative awareness video highlighting the significance of animals, their role in our environment, and the importance of protecting and caring for them. The video was designed to convey the message of animal welfare in an engaging and accessible manner, encouraging viewers to become more conscious of their responsibilities towards animals.

Following its completion, the video was shared across online platforms to reach a wider audience and spread awareness beyond the participating clubs. The collaboration provided an opportunity to bring together different communities for a common cause while using digital platforms as a means of promoting compassion and responsible treatment of animals.

<u>Conclusion:</u>

Overall, the initiative served as a meaningful effort to recognize World Animal Day and encourage greater awareness about animal welfare on an international level.
