About "Financial Literacy for Students"

Introduction:

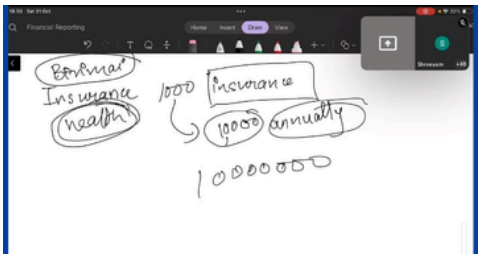

The Financial Literacy for Students program was hosted virtually on October 31, 2026, via Google Meet by the Interact Club of Emerald Academy and the Interact Club of Narayani Public School, in collaboration with seventeen partner Interact clubs, including the Interact Club of Gyanda Academy. Designed specifically for youth in Grades 8 through 12, the initiative aimed to equip young students with essential life skills in personal finance, budgeting, and smart money management. Through this joint digital platform, participating clubs united across districts to foster practical knowledge, fiscal responsibility, and youth empowerment for a financially literate future.

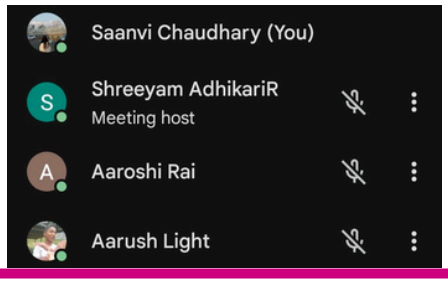

Project Summary:

The program was conducted on 31st October 2026 virtually via Google Meet from 6:00 PM NPT onwards. Members of the Interact Club of Gyanda Academy joined participants and leaders from the host and collaborating clubs to attend the inter-club financial awareness workshop.

During the session, students engaged in interactive discussions and learning modules tailored for Grade 8–12 youth, focusing on practical money management, saving strategies, smart investment concepts, and financial decision-making. Participants explored how early financial literacy contributes to personal independence and long-term economic stability, emphasizing the value of multi-club collaboration in driving educational advocacy across communities.

The program successfully sent a message of youth empowerment, practical education, and inter-club solidarity. It encouraged young attendees to adopt responsible financial habits and highlighted the power of collaborative digital initiatives in expanding access to essential life skills. The session concluded with a shared commitment among all collaborating clubs to continue hosting impactful joint educational programs.
