

The Member Connect

Project Number:12
Date:2, November,2026
Location:Valley public High School,Sundarbasti
Specified committee:Club Service
Area of Focus:Membership Development

About ‘The Member Connect'

Introduction:

The Member Connect is an interactive event conducted under Interact week with the theme of Membership Monday, with the aim of bringing club members closer and helping them get to know one another better. The event focuses on creating a friendly and welcoming environment where members can interact, share their interests, learn more about each other, and build stronger connections. Through various interactive activities, the event aims to strengthen the bond among members and create a greater sense of unity and belonging within the club.

Project Summary:

The Member Connect was organized with the aim of bringing all club members together and providing them with an opportunity to know one another better. The event began with interactive activities that encouraged members to introduce themselves, share their interests, and interact with people they might not usually get the chance to talk to. As the activities continued, members got to discover common interests, learn more about each other's personalities, and build new friendships. The event created a comfortable and welcoming atmosphere where everyone could freely express themselves, share a few laughs, and enjoy one another's company. It also gave newer members an opportunity to become more familiar with the club and feel included.

Conclusion:

Overall, the event helped strengthen the bond among members and allowed everyone to connect beyond their usual friend groups, making it a memorable experience filled with new friendships and connections.
