About "Polio Immunization Awareness Programme"

Introduction:

The Polio Immunization Awareness Programme was jointly organized by the Rotary Club of Birgunj and the Rotary Club of Birgunj Metropolis on October 29, 2026, at the Public Health Office in Pipara, Birgunj. Designed to educate local parents, caregivers, and community healthcare personnel, the initiative aimed to reinforce the critical importance of timely polio vaccination in safeguarding children's health. Through this direct public health intervention, Rotary leaders assembled to share vital medical guidance, address vaccine awareness, and strengthen the community's collective commitment to global polio eradication.

Project Summary:

The program was conducted on 29th October 2026 at the Public Health Office in Pipara, Birgunj. A targeted assembly of 25 mothers and approximately 8 to 10 local health workers gathered at the venue to participate in an interactive public health awareness session led by Rotary health experts.
During the event, key resource persons Rtn. Dr. Anand Kumar Jha and Mr. Jaymod Thakur delivered comprehensive briefings on the mechanics of polio transmission, the necessity of adhering to national immunization schedules, and the role of early vaccination in preventing childhood paralysis.
Participants engaged in discussions regarding community-level healthcare responsibilities, emphasizing the vital role mothers and frontline health workers play in ensuring no child misses a vaccine dose.
The program successfully sent a message of health advocacy, preventive care, and community empowerment. It encouraged local parents and healthcare workers to actively support immunization drives and highlighted the power of direct medical outreach in achieving a polio-free future. The event concluded with sincere appreciation extended to Rtn. Dr. Anand Kumar Jha and Mr. Jaymod Thakur for their dedicated contributions, alongside a reaffirmed pledge by both Rotary clubs to continue driving impactful health initiatives across Birgunj.
